Raspberry Pi introduction

If you are a newbie and you want to use the Raspberry Pi as a small computer, you need to prepare at least:

1x Raspberry Pi board

1x Power supply (Raspberry Pi4B power supply parameters are 5V, 3A)

1x SD card (8-32G) + 1x card reader (or use the official Raspberry Pi card to replace the SD card and card reader)

1 x Raspberry Pi screen+ 1x HDMI cable (can use Raspberry Pi 3.5-inch screen, 5-inch screen, 7-inch screen, desktop computer screen + HDMI to VGA cable, TV screen)

1x Mouse

1x Keyboard

If you are a newbie and you want to use a Raspberry Pi and do not have a usable screen, then you can try to use a laptop to remotely log in to the Raspberry Pi system. You need to prepare at least:

1x Raspberry Pi board

1x Power supply (Raspberry Pi4B power supply parameters are 5V, 3A)

1x SD card*1 (8-32G) + 1x card reader* (needs to burn the system image provided by Yahboom with remote service enabled)

1x Notebook

In addition to the above items that need to be prepared, it is also recommended that you prepare the following items to protect the Raspberry Pi and extend its service life:

1x Heat sink

1x Case + 1x cooling fan
